DUSTIN REED

SENIOR PRODUCT DESIGNER | ZERO-TO-ONE MARKETPLACES, DESIGN SYSTEMS

dustinreed.co | dr33d9@gmail.com | San Juan, Puerto Rico | linkedin.com/in/dreeddesign

SUMMARY

Senior Product Designer with 8+ years shipping zero-to-one marketplaces and design systems. Founding designer at a two-sided RV platform since 2018, scaling from launch to 500+ listings and 279% YoY host growth. I design end to end: brand, native iOS/Android, design systems, production React. Then I drive adoption through self-serve onboarding that converts. I prototype AI-assisted flows in code against live model output, designing interfaces where users stay in control when models fail.

SELECTED RESULTS

279% YoY marketplace host sign-ups | InfoCon business tripled after the self-serve quoting launch, as reported by the owner | Majority of B2B quote requests moved to self-serve | About 8% lead capture on paid search | 500+ listings at a 4.8 host rating

EXPERIENCE

Founding Designer & Product Lead, CurbNTurf
Remote | Dec 2018 - Present

- Designed the brand identity, two-sided marketplace, and native iOS/Android apps for an RV and camping stay platform; now 500+ active listings at a 4.8 host rating.
- Drove a 2023 supply push that lifted host sign-ups 279% year over year; roughly 90% compound annual growth has continued since.
- Designed self-serve host onboarding that removed sales dependency: landowners complete listing setup and go live independently.
- Designed the booking and checkout flow that captures the platform's 15% service fee, the company's only revenue stream.
- Led company-wide creative direction as CurbNTurf scaled to a 10-person team.
- Led v2 redesign with AI-assisted host onboarding: prototyped in Claude Code against live model output, designed correction flows for model errors, and defined AI integration strategy for the platform.
- Built production front end in Next.js, React, and TypeScript; earlier shipped designs in Webflow to deliver working code to developers, not static mockups.
- Designed the internal tools used by the field sales team.

Principal Designer, The Tink Tank
Remote | May 2018 - Present

- Run the studio for SaaS, healthcare, retail, and commerce clients, directing the freelance designers and developers each project needs.
- InfoCon + LRS: Designed two brand identities and a self-serve quoting system for a large-print book manufacturer; moved most B2B quote requests to self-serve with an instant price estimator, and the business tripled post-launch.
- New Smile Dentures: Rebranded a denture practice and designed conversion-optimized landing pages; SEO and paid search drove 5,000-10,000 monthly visits at ~8% lead capture rate.

Founder & Product Designer, StickyFlow
Remote | Mar 2026 - Present

- Designed the full product experience: positioning, brand identity, and a Next.js site built to sell deployed AI systems, not consulting. Interface prioritizes technical precision over marketing language.
- Built the systems themselves: RAG chatbots, LLM API integrations, and agent workflows in custom code, CRM syncing, and data pipelines, all within the client's own accounts and keys, so they retain the architecture and data.
- Design the interface layer for each system: how agents surface reasoning, signal confidence, and recover from errors while keeping users in control.

Graphic Designer, Ivie
Boise, ID | Mar 2017 - Dec 2018

- Designed national in-store campaigns for Albertsons (Fortune 500 grocery retailer), concept through rollout across 2,000 stores.

Graphic Designer, Vital Sign & Graphics
Rexburg, ID | Jul 2015 - Dec 2016

Graphic Designer, Brigham Young University-Idaho
Rexburg, ID | Apr 2014 - Jun 2016

SKILLS

Product Design: zero-to-one, two-sided marketplaces, self-serve onboarding, design systems, iOS and Android, component libraries, IA and search for large catalogs, interactive prototypes, usability testing
Design Tools: Figma, Adobe Illustrator, Adobe XD, Abstract, Lucidchart
Front End: React, Next.js, TypeScript, Tailwind, CSS, GSAP, Webflow
AI: LLM APIs (Anthropic, OpenAI, Gemini), RAG, prompt and agent design, Claude Code, Cursor, Antigravity
Growth & Analytics: SEO, Google Ads, landing-page conversion, Amplitude
Brand & Creative: brand and identity, art direction, accessibility (WCAG AA)
Languages: English (Native), Spanish (Fluent)

EDUCATION

Brigham Young University-Idaho, Bachelor of Arts (BA), Graphic Design | Rexburg, ID | 2014 - 2016 | GPA 3.7

PROJECTS

Dominó Caribe (dominoes-zeta.vercel.app): A web game of Caribbean dominoes with Dominican, Puerto Rican, and Cuban rules, in Spanish and English, against bots or online with friends. Built in three weeks with Claude Code in strict TypeScript: a pure rules engine, a written rules spec as the source of truth (the model asked when a rule was unclear instead of inventing one), and 589 automated tests.

Coqui Cardboard (coquicardboard.com): A 24,000-card sports-card catalog with command-palette search, built end to end in Next.js and Supabase. Search, filters, and catalog IA built from scratch for collectors who need to find specific cards fast.

Portfolio (dustinreed.co): Hand built. Designed a color control that rotates hue in OKLCH at constant relative luminance, preserving all 340 contrast ratios. Embedded WCAG AA enforcement in the design system with automated contrast checks that fail below the standard: accessibility as infrastructure, not audit.
