

DUSTIN REED

FOUNDING PRODUCT DESIGNER · DESIGN ENGINEER

(208) 405-1813 · dr33d9@gmail.com · dustinreed.co · linkedin.com/in/dreeddesign · github.com/dabomba9 · San Juan, Puerto Rico

I take products from no brand and no interface to shipped, and then I keep them: identity, product design, design systems, native apps, and the production front-end code that carries them. Seven years as founding designer on one marketplace, holding creative direction as it grew to ten, plus two companies of my own: a design studio since 2018 and an AI operations agency since 2026. I came to design from civil engineering, which is still how I think about constraints. Puerto Rico is a US territory, so there is no visa or sponsorship question.

SELECTED RESULTS

279% YoY marketplace host sign-ups · **3×** growth for a B2B client, per the owner · **Majority** of B2B quote requests moved to self-serve · **~8%** lead capture on paid search · **500+** listings at a 4.8 host rating

EXPERIENCE

CurbNTurf

A bootstrapped two-sided marketplace for RV travelers and private landowners.

Founding Designer & Product Lead

DEC 2018 – PRESENT · REMOTE

- Joined as the third employee, with a platform that barely worked and no visual identity at all. Built the brand, the marketplace and both native apps into a two-sided RV marketplace now running **500+ published host listings at a 4.8 average host rating.**
- Owned creative direction company-wide as the team grew to ten people, and carried it through weekly department and marketing reviews.
- Owned self-serve host onboarding, the company's central bet: no subscription meant no sales team, so every landowner had to sign themselves up alone. Led the 2023 supply push built on it: **host sign-ups rose 279% year over year, and roughly 90% compound annual growth has held since.**
- Designed the booking and checkout flow that carries the platform's **15% service fee**. With no subscription, that fee is the whole business, which makes checkout the least forgiving surface on the product.
- Leading the v2 redesign of the whole product, and designed the internal tools the field sales team works out of.
- Drove design into production, first by moving the work into Webflow so developers received working code instead of a mockup, now by writing the front end in Next.js, React and TypeScript and working into the backend.

SKILLS

PRODUCT DESIGN

zero-to-one · two-sided marketplaces · self-serve onboarding · design systems · iOS and Android · IA and search for large catalogs

FRONT END

React · Next.js · TypeScript · Tailwind · GSAP · Webflow

DESIGN

Figma · brand and identity · art direction · accessibility (WCAG AA)

GROWTH

SEO · Google Ads · landing-page conversion

SPOKEN

English · Spanish

The Tink Tank

Independent design studio. Most of the roster is under NDA.

Founder & Principal Designer

MAY 2018 - PRESENT • REMOTE • CONCURRENT

- Run the studio for SaaS, healthcare, retail and commerce clients, directing the freelance designers and developers each project needs.
- **InfoCon + LRS**: two brand identities and a 24/7 quoting and checkout system for **one of the largest independent large-print book manufacturers in the country**. The instant price estimator at its center moved **the majority of incoming B2B book requests to self-serve**. Per the owner, **business has tripled since launch**.
- **New Smile Dentures (2023–2025)**: rebranded a three-generation denture practice and ran the brand for nearly three years. SEO plus a **~\$1,500/month Google Ads program driving 5,000–10,000 monthly visits**, at a **~8% lead-capture rate**.

StickyFlow

My own AI operations agency. Workflow automation on a flat monthly subscription instead of an agency retainer.

Founder & Operator

2026 - PRESENT • REMOTE • CONCURRENT

- Founded it and run every part: positioning, pricing, brand, the automation builds, and the site itself in Next.js and GSAP. The product sells deployable systems rather than meetings, so the site reads as machinery.
- Build the work inside the client's own accounts, so they keep the architecture, the keys and the data. RAG chatbots, custom APIs, CRM syncing and data pipelines, delivered async.

Ivie

Graphic Designer

MAR 2017 - DEC 2018 • BOISE, ID

- Designed national in-store campaigns for **Albertsons, a Fortune 500 grocery retailer**, from concept through rollout across **2,000 stores**.

Earlier: Graphic Designer at Vital Sign & Graphics (2015–2016), and at Brigham Young University–Idaho (2014–2016), Department of Music campaigns plus mentoring students through the design thinking framework.

SELECTED PROJECTS

Coqui Cardboard

coquicardboard.com

A 24,000-card sports-card catalog with command-palette search, built end to end in Next.js and Supabase. No client, no brief, no revenue.

Portfolio

dustinreed.co

Hand built. A color control rotates hue in OKLCH at constant relative luminance, so all 340 contrast pairs hold their ratios. The build fails if one drops below WCAG AA.

EDUCATION

Brigham Young University–Idaho

BA, Graphic Design

2014 - 2016 • GPA 3.7
